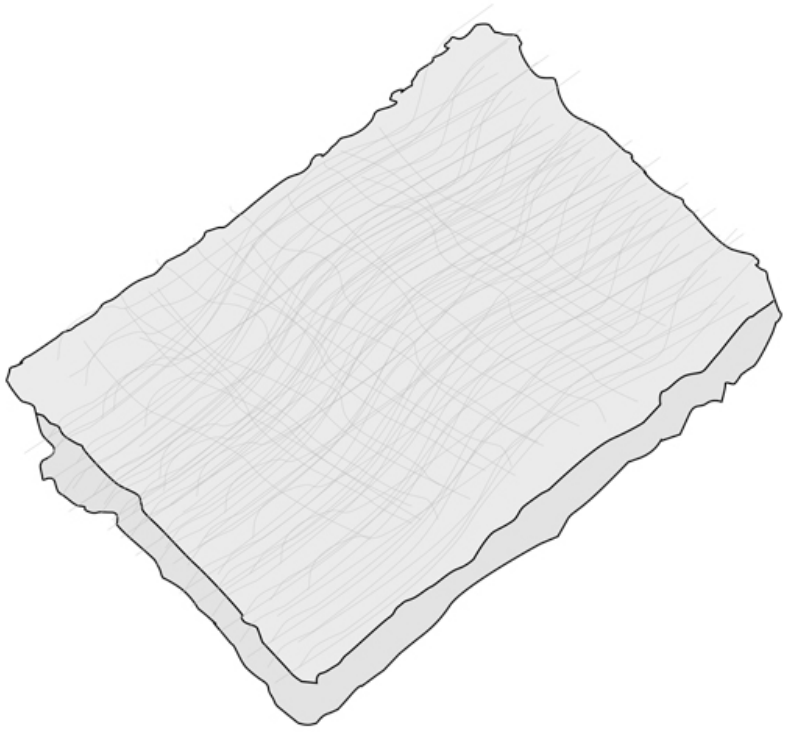
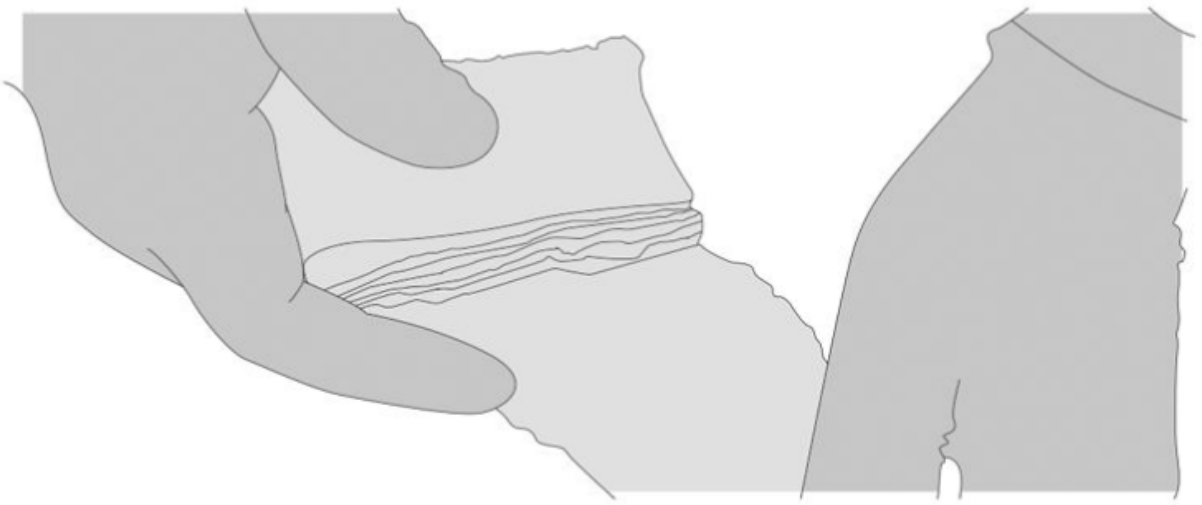
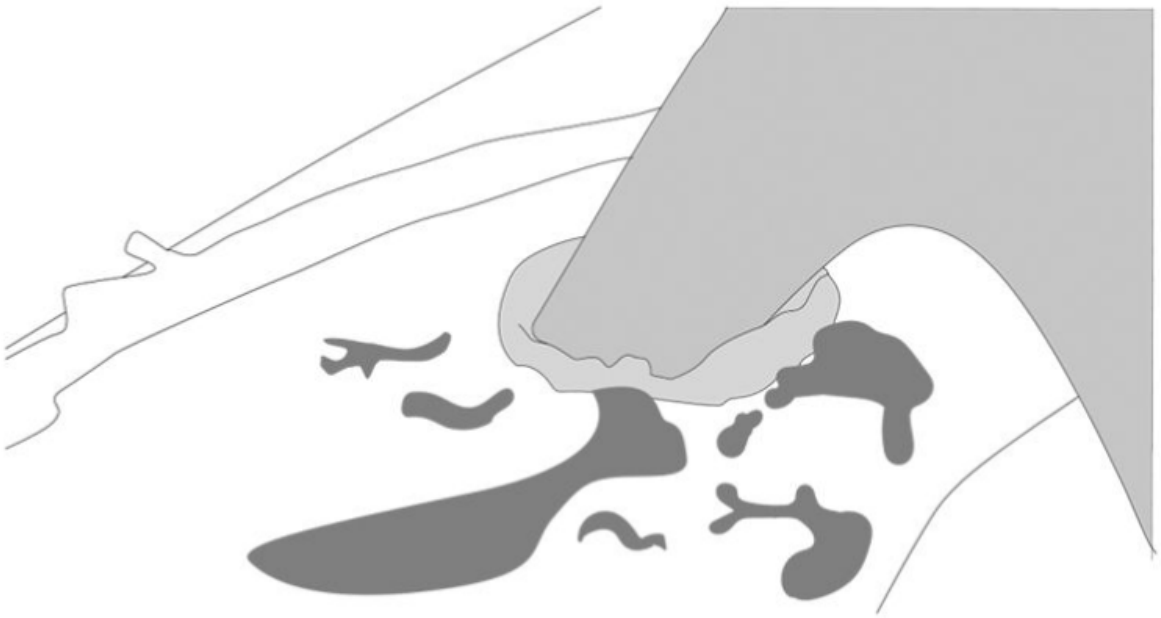
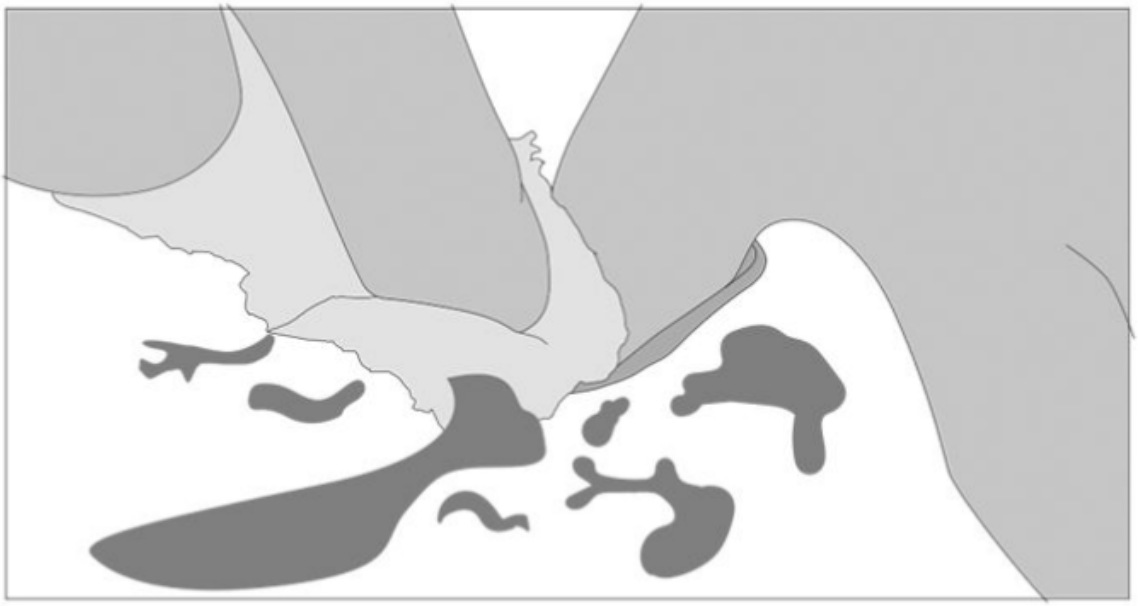
Compressed Gauze Users Manual

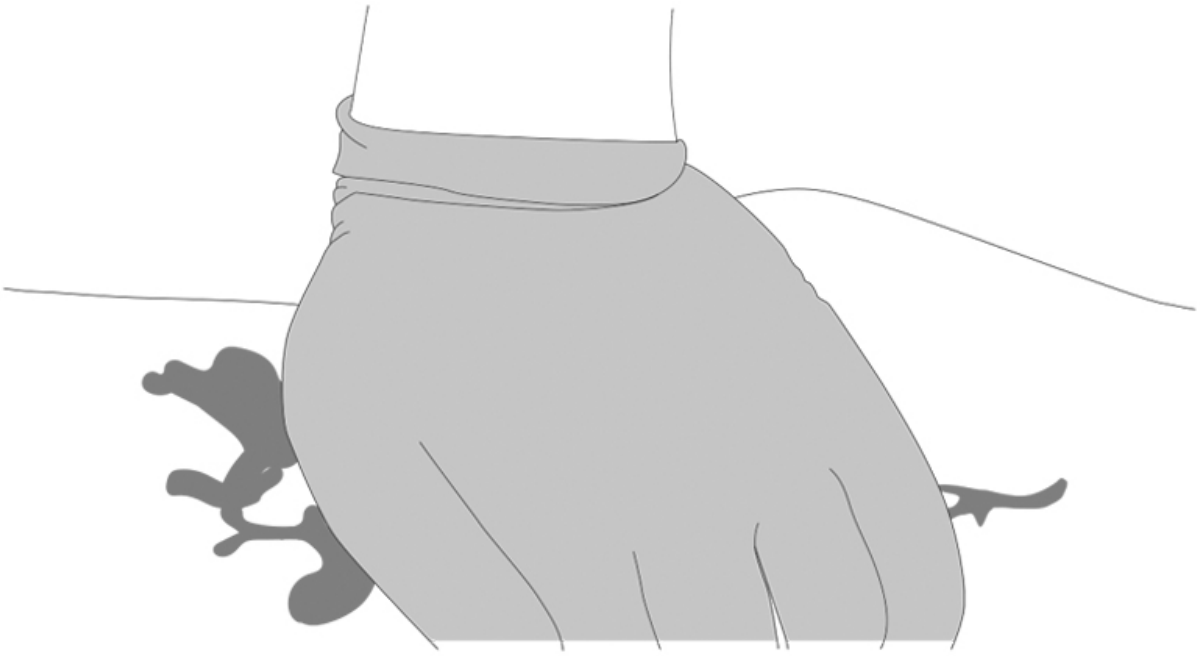


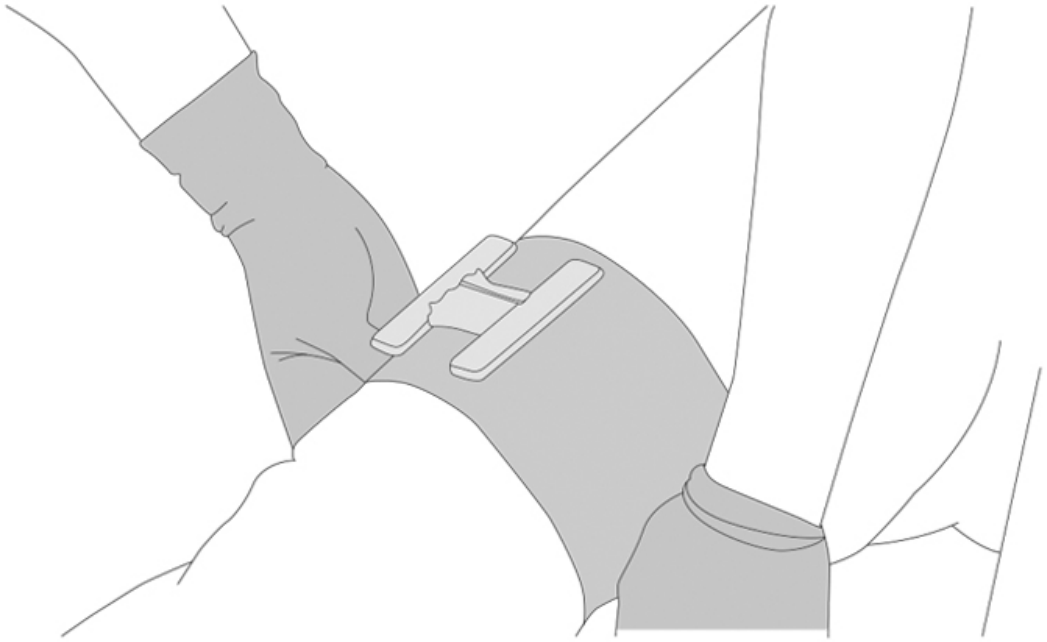
> Compressed, rolled gauze is ideal for wound bandaging and wrapping of injuries.
> Unique crinkle weave ensures excellent fluid absorption.
> Sterile & Latex Free.











Direction to Use Compressed Gauze

Step 1: Pull 6 to 8 inches of packing material out from the initial pack

Step 2: Probe the wound gently to check for shrapnel, find the source of bleeding and apply pressure

Step 3:Feed the pack into the wound until you reach the end of the wound

Step 4:When the wound is completely packed, apply pressure for ten minutes if no compression bandage is available

Step 5:Apply a trauma bandage to keep the gauze in place
